

Cyber Security as a service

Political unrest, fallout from the pandemic, the explosion in remote working and teaching, the digital society and the compulsory migration from traditional telephony to internet based telephone solutions all mean one thing. Increased threat area and the target is our massive dependency on the internet.

Cyber security is no longer a nice to have - it is an essential.

Now a major boardroom topic, this is now an issue for everyone:

- Today no organisation, whatever its size, is safe from the effects of Cyber Crime.
- The annual report by international insurance group Hiscox, published in May 2022, noted broadly similar views across the EU, the USA, Australia and the UK
- The median cost of attacks has doubled to £24,000 and the data also reveals a worryingly strong upward trend.

And it's not the big companies who are most at risk as it's the same ratio of incidents amongst public sector organisations.

Cyber protection for your School can be achieved with Mainstream's Security as a Service using a UK based SOCA (Security Operations Centre) that to date has never failed to protect Schools from Malware, Ransomware, Viral or Phishing attacks.

In addition, we can offer cyber threat mitigation to your mobile devices using our MDM solution.

We can appraise your environment for the use of Appguard to deal with day zero threats, and if required couple with withBorderpoint dealing with continuous monitoring of your School's changing vulnerability.

Utilisation of Appguard can lead to savings in traditional AV products and services.

This is a high-end Cyber Security Solution without Rolls-Royce pricing.

Being able to identify and prevent the propagation of an incident in a timely manner will significantly mitigate risks to an organisation and reduce the risk of future incidents occurring.

With an effective incident response plan, you will be able to detect happenings at an earlier stage and develop an effective defence against the attack.

For more information and advice about how our services such as SOCA, Borderpoint, Appguard, Sentinel, Lookout and our checks on Office 365 security will significantly benefit you. Call Mainstream Digital on **0800 169 6000** and talk to Pete or Matthew or email us on cybersecurity@msdigital.com now.

No obligation exploratory meetings and technical audits

Allow us to appraise your system and make some constructive suggestions, highlighting any immediate risks that need addressing.
