

Diversity of Portfolio – our mutual asset

As an organisation, Mainstream has always benefited from a broad and impressive range of technical skillsets. This has enabled us to diversify, relatively early on, from the Telecoms world into the multifaceted world of the Managed IT Service Provider.

What is a Managed IT Service Provider?

There's more to managed IT services than supporting existing business processes; they should be delivered using a holistic approach to technology that looks beyond the IT department – and considers its impact on the entire organisation.

This business-focused mindset has allowed us to break the mould in an industry that is saturated with IT suppliers that lack the scope to think holistically. By working with you as your IT partner, we can help you embrace technology's potential to drive your business forward.

Manufacturer Agnostic

With over 30 years experience of IT, Networking and Telecoms, and a team of experienced consultants, we have the inhouse skills to assist you in assessing your needs, developing a solution and a plan for implementation, and then implementing it. We can help you to find the right solution for your business, and not something 'convenient'.

Vertical Market Solutions

By knowing our client base, we have become knowledgeable in the business specific requirements of our clients, and this has allowed us to produce a portfolio of offerings to suit each business type, addressing the specific needs of the business or organisation type.

Recognising what is important to our customers

There is no "one size fits all". Your requirements for your systems and networks will be different to another organisation. We will work to understand what is essential to your business and offer you good practice advice on a range of options to best support your business against the critical back drop of compliance and budget. We will work hard to help you maintain the stability, competitiveness and agility of your business or organisation.

We can assist with everything from solutions to routine management and maintenance tasks.

No obligation exploratory meetings and technical audits

Allow us to appraise your system and make some constructive suggestions, by way of us demonstrating our capabilities, and, in particular, allow us to highlight any immediate risks that need addressing – particularly in the current Cyber threat high risk scenario that we find ourselves in. Never has a truer word been said, that prevention is better than cure – especially in the Cyber threat world.

Contact us to see what we can do to give you Peace of Mind.

We are here to help and offer the type of attentive, engaged service that you have been missing.
