

Telecoms for Schools

You are probably tired of being told that BT are switching off their copper networks with completion by mid 2025. As you know, the impact of this is that any of your PSTN or ISDN connected phone systems will no longer work and you will need to convert to another technology by then.

If the switch off is not completing until 2025, why do I have to worry about this now?

You can start to realise the savings and benefits of the technology now, and in so doing, also avoid the bottlenecks in service that will occur, seriously hampering your business and delaying your transition, as exchanges shut, as they will, much earlier than 2025.

Savings now

So, what are these savings that I can make now? Greatly reduced call charges, reduced rentals, incredible flexibility and scalability, access to new and more appropriate methods of communication. Also, the cost of the equipment required for conversion from your existing ISDN or PSTN technology to SIP will increase in cost as demand increases and product shortages prevail. Beat the rush, future proof and start saving now.

How should you do it?

Unlike some Telecoms suppliers, we won't give you a one size fits all solution that suits us. We will work with you and your existing implementation to help guide you to the solution that is best for you.

Whether that be:

- Upgrade to your onsite phone system to support the new internet based connectivity.
- Even if your existing system cannot be upgraded, we can still make it work with the new internet based connectivity.
- Replacement of your equipment with a new on site phone system.
- Or a hosted solution if the economics and functionality works for your establishment.

Even thinking of the hidden pitfalls

With the best will in the world, it is easy to overlook things like Alarms, Fax machines, Elevator emergency phones, disability monitoring etc. We think of these and offer you a solution for each so you won't become unstuck when you make the transition.

No obligation exploratory meetings and technical audits

Allow us to appraise your system and make some constructive suggestions, by way of us demonstrating our capabilities, and allow us to highlight any immediate risks that need addressing.

Also talk to us about our other areas of expertise. Particularly in the current Cyber threat high risk scenario that we find ourselves in. Never has a truer word been said, that prevention is better than cure – especially in the Cyber threat world.

Contact us to see what we can do to give you Peace of Mind.
